

# Telligen Oncology Care Program

## IMPROVED HEALTH

Cancer is the second most common cause of death in the U.S., accounting for nearly one in every four deaths. In addition, it is estimated that over 1.6 million people will be diagnosed with cancer in 2015<sup>1</sup>.

Telligen knows that having support for the member and their family is essential during this difficult time. We work with the provider to perform a holistic review of the entire treatment plan that will maximize the members' plan benefits. Our certified oncology nurses review the treatment plan for compliance with evidence-based care and adherence to the National Comprehensive Cancer Network recommendations for the diagnosis. This includes medical necessity and evaluation of standard of care including; chemotherapy, surgery, radiation, imaging and steerage to network providers.

## HOW IT WORKS

## THE TELLIGEN DIFFERENCE FOR MEMBERS

- **Educational support**
- **Assistance in navigating through the complex healthcare systems**
- **Assistance to keep the member at home vs. the hospital, or receiving outpatient services**
- **Proven treatment plan**
- **Assistance locating financial resources**

## THE TELLIGEN DIFFERENCE FOR CLIENTS

- **Members have increased satisfaction with health plan related to individualized care**
- **One case manager as point of contact**
- **PPO redirection to maximize benefits**
